

EGG DONATION TIMELINE

DONOR

Choosing a donor can take as long as you are comfortable taking. Assistance is available to shorten this process.

1

A few days to a few months

A few days to a few weeks

2

Dr Approval

Depending on the clinic protocol, this can take from a few days to a few weeks

CONTRACTS

You will be signing a contract with the agency to move forward with the matching process.

3

A few days

7-10 Days

4

AMH Testing

If you are working with a previous donor you may be able to skip this step.

PSYCH EVAL

Donor will meet with a counselor to be sure they are a fit for the egg donation process.

5

2-4 weeks

1-3 weeks

6

GENETICS

If you have had genetic testing and have carrier status, the doctor will want to test the donor.

GENETIC COUNSEL

Donor will meet with a counselor to discuss family medical history and genetic test results. (May not be required)

7

1-2 weeks

1-4 weeks

8

INITIAL TESTING

One of the tests at this visit is based on your donor's menses and can take from 1-4 weeks to take place

LAWYER

Now you will contact your third party fertility lawyer to guide you in your contract with the donor.

9

1-6 weeks

A few days

10

CALENDAR

This gives the donor the schedule for her medications and the window for retrieval.

MEDICATION

While on retrieval medication, the donor is able to go to a clinic local to her for monitoring.

11

2 weeks

2-10 days

12

RETRIEVAL

Donor will travel to your clinic for retrieval.

This whole process takes about 12 weeks.
